⁵ We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmo/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint.

⁶ Adjustable upper basket is 2-stage Rackmatic™ when Flex 3rd Basket is installed

⁷ Largest loadable dish height in upper basket will be smaller when Flex 3rd Basket is installed
